

Managed Security Operations Center & Compliance Monitoring Services

Reducing the risk, cost and time of deploying and maintaining security operations

MANAGED SECURITY

Terra Verde's portfolio of Managed Security Operations, Compliance, and Technology Services includes the following core solutions:

TRUSOC™

A remote, fully managed security operations center solution for medium and small sized organizations. TruSOC™ services include:

- 24x7x365 threat detection
- Vulnerability scanning
- Asset discovery
- Host and network behavioral monitoring
- Security intelligence services
- Reporting and platform maintenance

TruSOC™ can be modified to fit each customer's unique business and compliance requirements, and is integrated with each customer's existing infrastructure. The service can be billed annually or as a monthly subscription for convenience.

With over 300 SIEM installations, and 500 SIEM training customers, Terra Verde's solution engineering team is ready, willing and able to design, build, and integrate a SIEM platform, or help augment the staff of a Security Operations Center.

Other managed and valuable support services such as WAF and device monitoring, managed service desk and incident response services are also available.

BREACH RADAR™

A remote, fully managed security and compliance monitoring solution that is purpose built for small remote offices, retail locations or clinics.

Similar to physical security monitoring services that protect your home or business, Breach Radar™ was developed and priced specifically to help small businesses that are looking to stay secure and compliant.

The Breach Radar™ services include:

- Managed Breach Radar™ software
- 24x7x365 security and intrusion monitoring
- File integrity monitoring, data protection
- Security intelligence services
- Vulnerability scanning
- \$100,000 breach insurance
- PCI compliance ASV scanning
- PCI Certificate of Compliance
- Log collection, event correlation and analysis
- Security and compliance reporting portal
- Monthly reporting
- Security awareness training content
- Managed Anti-Virus/Malware/Ransomware software
- Service Desk (24/7/365)
- Managed Unified Threat Management
- Secure wireless access points
- Remote Ethernet device
- Hardware and Software maintenance (2, 3, 5 years)
- Secure equipment cages
